

## Full-Stack Developer Assignment

### Brief

---

Create an online, two-player Blackjack game.

### Design

---

You're free to use your imagination or just grab some code you found on Google. Make it so pretty that you would play it while in a team call with the webcam and microphone turned off.

### Requirements

---

- Two players should be able to join a game
- Start the match when both players are ready
- You can use WebSockets, Short-Polling, Long-Polling, etc
- Desktop only (no need to worry about responsive design)
- Deploy it on Heroku
- **Don't use a game engine**

## Tech Stack

---

- Node.js
- React
- SCSS

## Extra Points

---

Add sounds.
